Footnotes: Fruits

[1] Purees do not credit toward the meal pattern requirements when used to improve the nutrient profile such as applesauce used to replace oil in brownies. Purees will credit as juice if included in a beverage.

[2] Note: Fried banana chips are not creditable towards meal pattern requirements.

[3] In response to Salmonella outbreaks associated with raw melon, the Food and Drug Administration has provided guidance for safe handling practices for melons that include washing the outer surface of the melon thoroughly with cool tap water to remove surface dirt.

[4] According to the Food and Drug Administration, unpasteurized juice may contain harmful bacteria that may put children, pregnant women, the elderly, and persons with weakened immune systems at risk for serious illness or even death. Unpasteurized juice is normally found in the refrigerated section of grocery or health food stores or at cider mills or farm markets. Unpasteurized juice should have warning information on the label or on a nearby sign at the point of purchase. When serving juice, use only pasteurized juice. Pasteurized juice is normally found as frozen concentrated juice or in non-refrigerated shelf-stable containers, such as juice boxes, bottles, or cans. Pasteurized juice can also be found in the refrigerated sections of stores.

[5] The canned and frozen juices listed in Column 1 are usually available in the can size listed in Column 2.

[6] The seeds of this fruit are toxic and should not be consumed.
